## Physics in Art

Fredrick Prescott, an internationally known kinetic sculptor from Santa Fe, N.M., will be showing his art at the Ojai Art Center's "Art in the Park" this Saturday and Sunday. Ojai's Victoria Adam, a longtime friend of the artist, and collector of his work, visited the artist at his studio in August. Prescott's kinetic sculptures are bigger than life, solid steel, and depict a variety of colorfully painted animals that are engineered to move in the wind. Appearing in Libbey Park with Prescott will be a seahorse, zebra, elephant, giraffe, horse, moose and a prickly pear. Prescott exhibits internationally and has created pieces on commission for both private and corporate collectors, including Walt Disney Co., Porsche, and the Chicago Bulls.
